Curriculum Vitae   Miloš Vejnović

Personal Information

Name:	Miloš Vejnović
Birth date:	03.03.1983.
Citizenship:	Serbian
Address:	Džona Kenedija 22/20
	11070 Belgrade, Serbia
Phone:	011/2609302
Cell phone:	064/1842889
E-mail address:	milos.vejnovic83@gmail.com
LinkedIn:	www.linkedin.com/in/milos-vejnovic83
Repository:	https://github.com/milosvejnovic83

Education

10/2014 - 12/2016	**Specialist Studies: New computer technology** - College of Electrical Engineering and Computer Science in Belgrade
	- Applications for mobile devices (iOS and android)
	- Security of software
	- Design of information systems
	- Web systems and technology
	- Database applications
	- Software design
	- Final exam: Web application for trading with agricultural products (Web systems and technology)
From 09/2009	**MSc Course: Process technology and environmental protection**
	- Faculty of Mechanical Engineering, University of Belgrade
10/2002 - 09/2007	**BSc Course: Process technology and environmental protection**
	- Faculty of Mechanical Engineering, University of Belgrade
09/1998 - 06/2002	**6th Belgrade High School**

Projects

From June 2017	**Rox-e.Net business application**
	- Rox-e.NET is online business application which is using Angular 4 and DevExtreme for frontend. Programing of UI was performed using DevExtreme and there was a lot of customization of UI using regular HTML and CSS. I was mostly involved in creating UI in DevExtreme that used the data supplied by Angular 4. I was also programming parts of Angular 4 fronted and some functionalities were implemented by using jQuery in Angular 4.

From March 2018	**FDK - application for projects management**
	- Testing manually "FDK" application and collaborating with developers in order to fix bugs. Writing test plan and test cases (protocols). Test results are uploaded on Atlassian Jira and Confluence and there is also documentation in excel files with complete description of test cases and results.
From January 2018	**"Migration" application manual testing**
	- Testing manually "Migration" application and collaborating with developers in order to fix bugs. Testing cases were written by translating and adjusting test cases for previous version of the application that were written in German language. Test results are uploaded on Atlassian Jira and Confluence and there is also documentation in excel files with complete description of test cases and results.
09/2017 - 10/2017	**FDK17 pilot application UI development, testing and documentation writing**
	- Frontend of FDK17 pilot application was performed using Angular 2 and UI was developed in regular HTML and CSS. I was working on UI part of application and for that purpose was used regular HTML and CSS and resources that were provided by client. After finishing of entire application it was tested in all major browsers (Edge, Chrome, Firefox and Opera). I was also documenting every step during development and testing of the application including also user manual that was written for the purpose of client in order to present the application.
During 06/2017	**Up2d8 application**
	- Programming was performed using Angular 2. This part of the app was loading csv file, displaying it in table and performing CRUD operations on it. It was also prohibiting sending of duplicate or empty data to the backend which is performed on button click.
From 08/2016	**Web application for trading with agricultural products**
	- Programming was performed using the programming language PHP, CodeIgniter and Bootstrap frameworks for both client and server sides. MySQL was used for database management. Project is yet to be upgraded with different functionalities and features and after that put in to use.
10/2015 - 12/2015	**Database management application**

	- Programing was performed using Visual Studio environment. Application was made which provides user with possibility to see different information regarding trading company. In this project database which was used was Northwind provided by Microsoft for the educational purpose.
04/2015 - 06/2015	**Design of software for the company Centralinvest**
	- Project consisted of the designing of software for the trading company Centralinvest which included analyzing and projecting optimal software solution for company ERP.
04/2015 - 05/2015	**Friends locator application for android devices**
	- Programing was performed using Android Studio. Application consists from registration and login on the system. User information where stored in database and managed using SQLite. After login user can select different friends and see their location on Google map. Location and friend information where stored in JSON format.
09/2014 - 12/2014	**Design of information system of the part of Serbian mobile telecommunication company MTS**
	- Project consisted of the descripting of information system of the part of Serbian mobile telecommunication company MTS which was performed using VISIO.
07/2013 - 09/2013	**Calculator application for android devices**
	- Programing was performed using Eclipse environment. Goal was to create a calculator visually and functionally identical to real calculators which was successfully fulfilled.
03/2013 - 06/2013	**Red Star Belgrade application for android devices**
	- Programing was performed using Eclipse environment and goal was to show different views and other elements that are available on android devices. Red Star Belgrade application provides user with possibility to visit web presentations of Red Star teams in different sports, and also fan pages. Application was successfully tested and deployed on Aptoid store where it can be downloaded.

IT skills

Programming:	Java (intermediate level), PHP (intermediate level), CodeIgniter (intermediate level), Bootstrap 3 (intermediate level), Visual Studio (intermediate level), Android Studio (intermediate level), Swift (intermediate level), MySQL (intermediate level), JavaScript (intermediate level), Laravel 5 (basic level), Ruby (basic level), Ruby on Rails (basic level), jQuery (basic), Angular 2 (Regular),

	Ionic 2 (Regular), CSS (regular), HTML (regular), DevExtreme (regular), GIT/Bitbucket (regular), Atlassian Jira (regular), Atlassian Confluence (regular), Sass (basic), Less(basic), Redis (basic), Zend Framework (basic), ElasticSearch (basic), Bamboo (basic)
Computer usage:	Internet, Microsoft Office, Microsoft Windows administration, Networking, Solidworks, Eclipse IDE, NetBeans IDE, Xcode, Hardware, Nginx, Puppet4, Docker

---

Courses
Pluralsight.com:

- A Better CSS: LESS and SASS
- Angular 2 Getting Started
- Building Applications with Ionic 2, Angular 2 and TypeScript
- Angular Reactive Forms
- AngularJS: Get Started
- Angular CLI
- Technical Writing: Documentation on Software Projects
- What's New in ExtJS 5
- ExtJS Desktop Fundamentals
- Spring Fundamentals
- Maven Fundamentals
- Java EE: Programming Servlets
- Java EE 7 Fundamentals
- Java Web Fundamentals
- Java Platform: Working with Databases Using JDBC
- Java Fundamentals: The Java Language

Lynda.com:

- HTML Essential Training
- jQuery Essential Training
- Angular 2 Essential Training
- Programming foundation
- Java Essential Training
- Up and Running with Java Applications
- Android App Development with Java Essential Training
- Java Advanced Training
- PHP with MySQL Beyond The Basics
- PHP with MySQL Essential Training
- Laravel 5 Essential Training - 1 The Basics
- Bootstrap 3 Essential Training
- Up and Running with CodeIgniter

- MySQL Essential Training, Java Essential Training
- Ruby Essential Training
- Ruby on Rails 3 Essential Training 2.0
- CSS Fundamentals
- SolidWorks 2012 Essential Training

Professional experience

From 06/2017	Web developer at **Ever Near - Guidance doo**

- Developing frontend applications, QA and documentation writing

08/2014 - 05/2017	Sales engineer at **Centralinvest**

- Sales and technical support for wide range of hydraulic equipment.

08/2013 - 07/2014	Sales engineer at **STASTO** - **MS Promcom**

- Sales and technical support for STASTO pneumatics, industrial valves and hydraulics, JOHN CRANE mechanical seals, AIRCOM compressed air systems, COAX coaxial valves, POMPETRAVAINI centrifugal and vacuum pumps.

Part-time jobs

01/2013 - 07/2013	Programming of applications for mobile phones (android)
09/2012 - 12/2012	Bookseller and storekeeper at **Hol Net**
07/2012 - 09/2012	Salesman at **Videx**
07/2009 - 10/2009	Salesman at **Veronezze**
06/2008 - 03/2009	Illustrator and column writer at **Publik Praktikum**

Volunteering and internships

07/2011 - 08/2011	Volunteer/salesman at **Knez Petrol**
07/2007 - 08/2007	Internship at **IMT Belgrade**
07/2006 - 10/2006	Internship at **Zmaj Belgrade**

Seminars

STASTO:	Training on industrial pneumatics, armatures and hydraulics, Advanced training on industrial hydraulics, CRM training (business software for commercial jobs)
COAX:	Basic training on coaxial valves
AIRCOM:	Basic training on compressed air systems
JOHN CRANE:	Basic training on mechanical seals

Other knowledge and skills

Languages:	Mother Language: Serbian
	English (Advanced user, Excellent conversation capabilities)
	Russian (Basic user, Basic conversation capabilities)
Other skills:	analytic, organizational, presentation, illustration, excellent observation capabilities, team work, driving license B category
